

- An introductory paragraph briefly summarizing who you're interviewing, the time/place, and the purpose of the interview.
- An opener and closer.
- 15-20 questions (mostly open-ended) with probes for at least 10 questions.

Summary: I intend to interview my former professor, Dr. Lindsay Weinberg, to learn more about her research, educational background, and current areas of interest. Her class genuinely changed how I think about the world, so I am interested in learning more about her work and how I can pursue something similar in graduate school. I still do not have a set time or place yet, although I predict I may interview her in her office.

Opener: Hello Dr. Weinberg, how are you? Thank you for taking the time to meet with me today. This interview will be about an hour long, and we will focus on topics related to your research, current work, and educational background.

Questions:

Current Projects/Research:

1. Tell me about the main projects you are working on right now.
2. What are you currently focusing on in your research?
 - a. Why did you decide to focus on this topic?
 - b. How do you hope your research will impact others?
3. What have you researched previously?
 - a. How does this connect to what you are researching now?
4. Tell me about why you founded the Tech Justice Lab.
 - a. What was the process like?
 - b. Are there similar labs at other universities?
5. Tell me about what you teach here at Purdue.
 - a. What class do you like to teach the most?
 - b. What do you hope students take away from your classes?
6. What would your dream class to teach be?
 - a. Why?

Education/Career:

7. How would you describe your educational background?
8. How did you know you wanted to pursue this domain of study?
 - a. Were there specific events or individuals who inspired you?
9. How has your educational background affected how you perceive the world?
 - a. Do you think more people should share this perception?
10. What, in your view, is the benefit of an interdisciplinary education?
 - a. Should more emphasis be placed on education being interdisciplinary, in general?
11. What advice would you give to someone who wants to pursue a similar path?
 - a. What courses or disciplines should they pursue?
12. Are there educational programs or degrees that you know of that support this domain of study?
 - a. What are they?

Introspective (All academia-focused):

13. From your time in academia, what (project) are you most proud of?
14. If you could give your younger self advice (about academia), what would it be?
15. What (projects) are you looking forward to in the future?

Closer: That's all the questions that I have for you. Thank you so much for meeting with me. I greatly appreciate it and I learned a lot. Have a great rest of your day!
